# 1 INTRODUCTION

Ninyo & Moore was retained by Chambers Group, Inc. (herein referred to as the client) to perform a Phase I Environmental Site Assessment (ESA) of a property in Riverside County with Assessor's Parcel Numbers (APNs) 408-250-034, 408-240-038, 408-100-025, 408-100-024, 408-090-066, and 419-690-030. These APNs comprise the Cherry Channel Drainage and are located adjacent to Cherry Avenue between Cougar Way and Oak Valley Parkway in Beaumont, California (hereinafter referred to as the subject property; Figure 1). The following sections discuss the purpose, the involved parties, the scope of services, and the limitations and exceptions associated with the Phase I ESA.

## 1.1 Purpose

The objective of this ESA is to identify, to the extent feasible pursuant to the process described in ASTM International (ASTM) E1527, recognized environmental conditions (RECs), which are defined by ASTM as "(1) the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment." Ninyo & Moore performed this ESA in conformance with the scope and limitations of ASTM E1527-21.

Identification of RECs fall into the following three categories: existing RECs (as defined above); Historical RECs (HRECs); or Controlled RECs (CRECs). HRECs and CRECs are defined as follows:

- HREC – An HREC is defined as “a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations [AULs], institutional controls, or engineering controls).” An HREC is an environmental condition, which in the past, would have been considered a REC, but currently may or may not be considered a REC. An example of an HREC may be a former gas station where a release of gasoline had occurred, but the subject property was cleaned up to an unrestricted land use standard.
- CREC – A CREC is defined as a “recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by a regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, AULs, institutional controls, or engineering controls).” An example of a CREC could be a former gas station where a release of gasoline has been cleaned up to a commercial use standard, but does not meet unrestricted residential cleanup criteria.

## 1.2 Scope of Services

Ninyo & Moore's scope of services for this Phase I ESA consisted of the activities listed below.

- Reviewed physical setting and background information.
- Performed a subject property reconnaissance.
- Reviewed federal, state, tribal, and local regulatory agency databases for the subject property and for properties located within a specified radius of the subject property.
- Reviewed reasonably ascertainable local regulatory agency files for the subject property, as applicable.
- Reviewed historical information for the subject property, such as historical aerial photographs, historical topographic maps, reverse street directories, Sanborn® Fire Insurance maps, and building department records.
- Reviewed user-provided information, as available.
- Reviewed other documents provided from third party sources, as available.
- Interviewed the property owner representative (if available) regarding the environmental status of the subject property.
- Prepared this Phase I ESA report, summarizing findings and providing opinions and conclusions regarding RECs at the subject property.

## 1.3 Significant Assumptions

Ninyo & Moore assumes the information sources from the third-party environmental database vendor, regulatory agencies, and interviewees utilized for this report provided adequate and accurate information. Other significant assumptions were not made during the preparation of this report.

## 1.4 Limitations and Exceptions

The environmental services described in this report have been conducted in general accordance with current regulatory guidelines and the standard of care exercised by environmental consultants performing similar work in the project area. No warranty, expressed or implied, is made regarding the professional opinions presented in this report.

This document is intended to be used only in its entirety. No portion of the document, by itself, is designed to completely represent any aspect of the project described herein. Ninyo & Moore should be contacted if the reader requires any additional information or has questions regarding the content, interpretations presented, or completeness of this document.

The findings, opinions, and conclusions are based on an analysis of the observed subject property conditions and the referenced literature. It should be understood that the conditions of a subject

property could change with time as a result of natural processes or the activities of man at the subject property or nearby properties. In addition, changes to the applicable laws, regulations, codes, and standards of practice may occur due to government action or the broadening of knowledge. The findings of this report may, therefore, be invalidated over time, in part or in whole, by changes over which Ninyo & Moore has no control. Ninyo & Moore cannot warrant or guarantee that not finding indicators of any particular hazardous material means that this particular hazardous material or any other hazardous materials do not exist on the subject property. Additional research, including invasive testing, can reduce the uncertainty, but no techniques now commonly employed can altogether eliminate the uncertainty.

## 1.5 Special Terms and Conditions

This study did not include an evaluation of geotechnical conditions or potential geologic hazards. In addition, unless otherwise indicated in this report, this Phase I ESA does not include analysis of the following, which is not intended to be all-inclusive: underground pipelines, regulatory compliance, cultural and historic resources, industrial hygiene, health and safety, ecological resources, endangered species, or high voltage power lines.

## 1.6 User Reliance

This report may be relied upon by, and is intended exclusively for, the client and its assigns. Any use or reuse of the findings, opinions, and/or conclusions of this report by parties other than these is undertaken at said parties' sole risk.

## 1.7 Involved Parties

Ms. Kelsey Hilton, Environmental Assistant, performed historical research, document review, and performed the subject property reconnaissance on July 29, 2024. Mr. Benjamin White, Project Geologist, and Mr. Jeff Aguilar, Principal Geologist, performed project oversight and quality review.

# 2 SUBJECT PROPERTY DESCRIPTION

The following table provides a general description of the subject property. Photographs taken during the subject property reconnaissance are provided in Appendix A.

Table 1 – General Subject Property Setting	
General Subject property Setting	Description
Location	The subject property is comprised of six parcels of land located adjacent to Cherry Avenue between Cougar Way and Oak Valley Parkway in Beaumont, California (Figure 1).
Assessor Parcel No.	408-250-034, 408-240-038, 408-100-025, 408-100-024, 408-090-066, and 419-690-030 (Riverside County).
Property Owners	408-250-034: City of Beaumont 408-240-038: City of Beaumont 408-100-025: City of Beaumont

Table 1 – General Subject Property Setting	
General Subject property Setting	Description
Property Owners (Continued)	408-100-024: City of Beaumont and a portion of 408-090-066: Electrical Easement 419-690-030: City of Beaumont
Size (approximate)	4.98 acres
Subject property Use / Occupants	The subject property is developed as a channel (Cherry Channel) that captures urban runoff. From Cougar Way to Rover Lane, an access road spans the Cherry Channel to the east. The access road recontinues at East Oak Valley Parkway to the south. APN 408-090-066 is additionally developed with power cables, as well as two parking lots and a walking path.
Structures	APN 408-090-066 is developed with two transmission towers, two parking lots, and a walking/bike path; however, the focus of this investigation is on the area containing the Cherry Channel and the parking lot to the east, within the electrical easement. The remainder of the parcels contain a channel lined with a geomaterial.
Roads	The subject property is bound to the eastern side of Cherry Avenue, and the southern side of Cougar Way. The subject property is accessible via Cherry Avenue. APNs 408-250-034, 408-240-038, 408-090-066, 408-100-025, and 408-100-024 are located to the north of East Oak Valley Parkway. APN 419-690-030 is located to the south of East Oak Valley Parkway.
Heating and Cooling Systems	No HVAC system is present at the subject property.
Electricity Provider	Southern California Edison
Sewer Disposal Provider	City of Beaumont
Potable Water Provider	Potable water is not provided onsite.
Natural Gas	Natural gas is not provided onsite.
Subject Property Vicinity Description	The subject property vicinity consists of residential units to the north, east, south, and west. An adult education and middle school are present to the west, and additional residential developments are located to the southwest. A community center is located to the east of the subject property. Energy lines traversing from northwest to southeast intersect the subject property.

## 2.1 Physical Setting

The following table summarizes topographic, geologic, and hydrogeological conditions in the vicinity of the subject property, based upon the referenced documents review and/or our visual reconnaissance of the subject property.

Table 2 – Physical Setting		
Physical Settings	Reference	Summary
Topography	A	The subject property elevation is approximately 2,620 to 2,840 feet above mean sea level (MSL). The subject property vicinity is relatively flat with the Channel running through. Regional topography slopes gently to the south.
Geology	B	The subject property is underlain by Quaternary alluvial fan deposits, consisting of sand and gravels. These deposits are derived from the San Bernardino Mountains to the north.
Surface Water	C	The target property is currently developed with a drainage channel (Cherry Channel) that is managed by the City of Beaumont. This subject property feeds into the Potrero Creek from the southern portion of the Cherry Channel. Approximately 0.38 miles to the northwest of the subject property, there is an unnamed creek, which feeds into Little San Gorgonio Creek.
Groundwater	B, D	According to the Sundance Specific Plan, provided by the client, depth to groundwater was approximately 35 feet below ground surface in 2000, but has declined in depth by 100 to 150 feet due to utilization of groundwater resources for urban and agricultural uses in the area. The Sundance residential community development included improvements to Cherry Channel. Groundwater flow direction was not listed on nearby reports reviewed on Geotracker, however, review of topographic maps suggest that groundwater could be flowing in the southwestern direction. Groundwater levels and gradient can fluctuate due to seasonal variations, groundwater withdrawal or injection, changes in land use, and other factors.

### 3 USER-PROVIDED INFORMATION

Ninyo & Moore provided a user questionnaire to be filled out by Mr. Vincent Lopez, Project Manager at the City of Beaumont. Mr. Lopez completed and returned the user questionnaire back to Ninyo & Moore on July 29, 2024.

Table 3 – Summary of User-Provided Information	
User's Responsibilities	User's Responses
Title Records	Title records were not provided by the client.
Environmental Liens or Activity and Use Limitations (AULs)	Mr. Lopez did not have knowledge of environmental liens or land use limitations for the subject property after a search of the California Environmental Protection Agency (CalEPA) Regulated Site Portal.
Specialized Knowledge	Mr. Lopez did not have specialized knowledge for the subject property.
Commonly Known or Reasonably Ascertainable Information	Mr. Lopez did not indicate the current use of the subject property.
Valuation Reduction for Environmental Issues	Mr. Lopez did not indicate if the purchase price for the subject property reasonably reflects the fair market value.
Reason for Performing Phase I ESA	Mr. Lopez indicated the reason for performing the Phase I ESA was due to the City of Beaumont proposing to line the subject property with concrete.

### 4 RECORDS REVIEW

The following sections summarize records reviewed for the subject property.

#### 4.1 Standard Environmental Record Source - Environmental Database Search

A computerized, environmental information database search was performed by Environmental Data Resources, Inc. (EDR) on July 16, 2024. The search included federal, state, tribal, and local databases. A summary of the environmental databases searched, their corresponding search radii, and number of noted properties of potential environmental concern, is presented in the EDR report (Appendix C). The review was conducted to evaluate whether the subject property or properties within the subject property vicinity have been documented as having experienced significant unauthorized releases of hazardous substances or other events with potentially adverse environmental effects.

##### 4.1.1 Geocoded (Mapped) Listings

Properties within up to one-mile radius of the subject property were listed on various regulatory agency databases. The following table lists databases that were searched and the number of listings (excluding non-geocoded [unmapped] properties).

**Table 4 – Summary of Database-Provided Information**

Database Name	Search Radius (mile)	Number of Listings
<b>Federal Databases</b>		
NPL (National Priority List)	1	0
Proposed NPL	1	0
NPL LIENS (Federal Superfund Liens)	1	0
Delisted NPL	1	0
FEDERAL FACILITY (Federal Facility Site Information listing)	0.5	0
SEMS (Superfund Enterprise Management System; formerly Comprehensive Environmental Response Compensation and Liability Information System)	0.5	0
SEMS-ARCHIVE (Superfund Enterprise Management System Archive)	0.5	0
CORRACTS (facilities subject to Corrective action under RCRA)	1	0
RCRA-TSDF (hazardous waste treatment, storage, or disposal facilities)	0.5	0
RCRA-LQG (large quantity generator)	0.25	0

Notes: AST – Aboveground storage tank CERS - California Environmental Reporting System DTSC – Department of Toxic Substances Control LUST – Leaking Underground Storage Tank RCRA – Resource, Conservation, and Recovery Act SCH - School Property Evaluation Program SWEEPS - Statewide Environmental Evaluation and Planning System UST-Underground storage tank		

The subject property was not listed in any pertinent environmental databases as searched by EDR.

**Table 5 – Summary of Off-Subject Property Facilities of Potential Concern**

Facility Name/Address	Distance/Direction from Subject property (Approximation by EDR)	Database	Summary
Chavez Elementary School and Expansion Cherry Avenue/Mary Lane	Approximately 711 feet to the northwest.	ENVIROSTOR SCH	The ENVIROSTOR database noted this facility (Facility ID: 33010035) as having the potential contaminants of concern as Arsenic, Chlordane, dichlorodiphenyldichloroethane (DDD), dichlorodiphenyldichloroethylene (DDE), and dichlorodiphenyltrichloroethane (DDT.) A soil sampling workplan was completed and DTSC listed the site status as no further action. Based on the distance from the subject property, estimated groundwater depth and flow direction, and the lack of information indicating that a release has occurred at this site that could impact the subject property, this site does not represent an environmental concern to the subject property.
Beaumont Unified School District Transportation 1001 Cougar Way	Approximately 1,090 feet to the northwest	AST SWEEPS UST HIST UST NPDES CIWQS CERS	The AST database listing reports a total of 15,000 gallons of product stored at this facility. The number of tanks and the facility ID were not listed. The SWEEPS UST and HIST UST database listed this facility with the Comp Number 56761 and as having 4 tanks. The SWEEPS UST reported one – 8,000 gallon leaded, one – 8,000 gallon diesel, one – 2,000 gallon regular unleaded, and one – 2,000 gallon leaded underground fuel tanks. These listings were created in February 29, 1988, but contained no specified end date. The HIST UST specified that two tanks were installed in 1973 and two were installed in 1977. The CERS, CIWQS, and NPDES databases noted only clerical violations for the currently active aforementioned listing. Based on the distance from the subject property and the estimated groundwater depth and flow direction, this site does not represent an environmental concern to the subject property.

**Notes:**

- Distances and direction provided by EDR
- A description of each database is provided in the EDR Report (Appendix B).

It is our opinion that there is a low likelihood that the remaining listings for properties within the subject property vicinity in the database report represent a REC to the subject property at the current time. This opinion is based on one or more of the following factors:

- The nature of the database(s) on which the property is listed, and/or because the property was not listed on a database that reports unauthorized releases of hazardous substances;
- Reported regulatory agency status (i.e., case closed);
- Reported nature of the case (i.e., soil contamination only);
- Reported distance of the property from the subject property; and/or
- Location of the property in relation to the subject property with respect to topography or expected groundwater flow direction (south-southwest).

#### 4.1.2 Non-Geocoded (Unmapped) Listings

Unmapped properties are shown by EDR as Orphan Sites. Two unmapped facilities were included in the EDR Radius Map™ Report. Based on our reconnaissance of the subject property vicinity and a review of the unmapped listings, they are not within the applicable search radii. There is low likelihood that the unmapped facilities had a negative environmental effect on the subject property.

## 4.2 Additional Environmental Record Sources

According to the ASTM Standard, “if the property or any of the adjoining properties is identified on one or more of the standard environmental record sources, pertinent regulatory files and/or records associated with the listing should be reviewed.” Records were requested from local regulatory agencies for subject property Riverside County with APNs 408-250-034, 408-240-038, 408-100-025, 408-100-024, and a portion of 408-090-066 and 419-690-030, as well as the address of 1575 Cherry Avenue, which was adjacent to the subject property. The address was only provided as an alternative when regulatory agencies requested a physical address, and not an APN. The review of regulatory agency records for the subject property address is discussed in the following sections. Off-subject property facilities of potential concern to the subject property were reviewed on online environmental databases (i.e. GeoTracker and EnviroStor), which are discussed in Section 4.1.1. Regulatory records for the subject property are provided in Appendix D.

### 4.2.1 California Department of Toxic Substances Control (DTSC)

Ninyo & Moore requested records for the subject property from the DTSC Cypress office on July 17, 2024 with APNs associated with the subject property. A representative reached out and requested a physical address to perform the site search. Since the subject property is not associated with a physical address, the address of an adjacent property along the west boundary was provided. Documents pertaining to an address approximately 0.75-mile away were provided, but were reviewed and not relevant to the subject property.

### 4.2.2 County of Riverside Department of Public Health (RIVCO)

Ninyo & Moore requested records for the subject property from the County of Riverside Department of Public Health on July 16, 2024. According to a representative of RIVCO, a records search was not possible with only an APN and no definitive address. An address to an adjacent property, 1575 Cherry Ave, Beaumont, to the west of the subject property was provided to RIVCO on July 24, 2024. RIVCO stated that they did not have files for the requested address.

### 4.2.3 California State Water Resources Control Board (CSWRCB)

Ninyo & Moore requested records for the subject property from the California State Water Resource Control Board on July 16, 2024. According to a representative of CSWRCB, a records search was not possible with only an APN and no definitive address. An address to an adjacent property to the west of the subject property was provided to CSWRCB on July 24, 2024. CSWRCB stated that they did not have files for the requested address.

#### 4.2.4 Online Regulatory Databases

Online regulatory databases were reviewed by Ninyo & Moore to supplement the environmental database search conducted by EDR. The following is a summary of information.

Table 6 – Online Regulatory Databases	
Online Database/Website	Findings
California Department of Toxic Substances Control (DTSC) EnviroStor	The subject property was not included in the EnviroStor database. Adjoining properties and off-subject property facilities within the applicable search radii were included in the EnviroStor database and are discussed in Section 4.1.1.
State Water Resources Control Board GeoTracker	The subject property was not included in the GeoTracker database. Adjoining properties and off-subject property facilities within the applicable search radii were included in the EnviroStor database and are discussed in Section 4.1.1.
National Pipeline Mapping System (NPMS) website	Based on a review of the National Pipeline Mapping System (NPMS) website, an active natural gas pipeline (pipeline ID 49082) operated by SOUTHERN CALIFORNIA GAS CO. trends westward along East Oak Valley Parkway. This pipeline intersects the subject property at the intersection of Cherry Avenue and East Oak Valley Parkway. Records concerning spills or releases from these pipelines were not plotted within the vicinity of the subject property on the website (NPMS, 2024). This is not considered a REC to the subject property.
California Department of Conservation Geologic Energy Management Division (CalGEM) Well Finder	The subject property is not within the administrative boundaries of an oil/gas field. Wells were not observed in proximity to the subject property.

### 4.3 Subject Property Historical Use Information

Ninyo & Moore conducted a historical record search for the subject property. This included a review of city directories, historical fire insurance maps, historical aerial photographs, topographic maps, and building department records. The following sections summarize information obtained from the historical sources utilized for this assessment.

#### 4.3.1 City Directories

Available historical reverse street directories from 1971 through 2020 were researched by EDR. Addresses are not associated with APNs 408-250-034, 408-240-038, 408-100-025, 408-100-024, 408-090-066, and 419-690-030; therefore, the subject property was not listed in the EDR City Directory.

Properties in the subject property vicinity consisted primarily of residential neighborhoods on all sides of the subject property. Based on the addresses provided in the EDR City Directory, an adult school and middle school were reported in the city directories to be on the west side of the property. The city directories are provided in Appendix E.

#### 4.3.2 Sanborn® Fire Insurance Maps

Sanborn® Fire Insurance maps were requested from EDR. However, EDR reported that fire insurance maps covering the target property were not found (EDR, 2024). The Certified Sanborn Map Report is provided in Appendix E.

### 4.3.3 Historical Aerial Photographs

Historical aerial photographs were provided by EDR for select years from 1938 through 2020. A 2024 aerial photograph was reviewed online using Google Earth™. A listing of the photographs reviewed and summary of notable observations from the photograph review are provided in the table below. EDR-provided aerial photographs are included in Appendix E.

Table 7 – Aerial Photographs Summary		
Date	Source	Summary
1938 1949 1953 1961	A	By 1938, the subject property appears to be in agricultural use. A road was present to the western boundary of the subject property and an unpaved road intersected the southern portion of the property. Small, apparently residential and agricultural support buildings were observed on adjacent properties near the northern and southeastern portions of the subject property. Adjacent areas to the subject property appeared to be predominately in agricultural use.  By 1949, the subject property appeared to remain in agricultural use. A transmission line, extending from east to west, traversed the southern portion of the property.  By 1953, the small residential structure to the southeast of the subject property no longer appeared to be present.  By 1961, an additional transmission line was observed crossing the center portion of the subject property. The additional line was observed running parallel to the previous line. At an adjacent property to the west, a present-day school, appeared to be graded and in the initial stages of development.
1967 1973 1975	A	By 1967, the adjacent present-day school has undergone further development. The subject property appears to still be in agricultural use.  By 1973, a residential complex has been partially developed to the west of the subject property. A commercial parking lot and improved pad appeared to be developed to the west of the subject property, in close proximity to the transmission lines.  By 1985, an additional transmission line traversed the southern property, running in the east to west direction.
1985 1989 1996 2006 2009 2012 2016 2020	A, B	By 2006, a portion of the southern section of the subject parcel was graded. The northern portion of the subject property may still be in agricultural use. A paved road replaced the dirt road that previously traversed the southern portion of the property. Adjacent property to the southeast of the site was graded for residential development. Additional residential buildings were observed on adjacent property to the west, located south of the school development.  By 2009, the southern portion of the subject property had been developed with a drainage. The northern portion of the subject property appears to have an unlined drainage, and the larger agricultural operation may have ceased and become vacant land. Residential buildings were observed to the southeast and south of the subject property. A commercial property development was observed on an adjacent property to the east of the subject property. A parking lot and walking path were observed under the transmission lines, to the south of the subject property. A driveway to access this parking lot was developed on the subject property.  By 2016, the Channel extended the length of the subject property. Previously agricultural land adjacent to the east of the subject property was graded for a residential community. A paved road was extended from east to west, directly adjacent to the northern portion of the subject property.
2024	B	By 2020, the residential community to the east of the subject property was developed. A communication tower had been installed to the north of the trailer home community, to the west of the subject property. A Google Earth image search for 2024 showed that one of the three transmission tower lines had been removed from the electrical easement.
Sources: A - EDR B – Google Earth		

The subject property was used for agricultural purposes by 1938 until approximately 2006. The most notable development consists of the drainage installation that parallels Cherry Avenue. The Cherry Channel appeared to have been developed in portions, starting with the

southern parcels in 2006. Between 2006 and 2016, the remaining portions of the current drainage were developed.

4.3.4 Historical Topographic Maps

Historical topographic maps for select years between 1901 and 2021 were provided by EDR. A listing of the topographic maps reviewed and a summary of notable observations are provided in the table below. EDR-provided maps are included in Appendix E.

Table 8 – Historical Topographic Maps Summary	
Date - Source	Summary
1901	The 1901 topographic map does not depict any features on the subject property. An unlabeled, north-south trending road adjoins the subject property to the west. An unmarked, east-west trending road was depicted cutting across the southern half of the subject property.
1943 1948 1953 1956	The 1943 through 1956 topographic maps did not depict any features on the subject property. Structures are depicted to the northwest and southwest of the subject property. Land being developed for agricultural purposes was depicted to the southwest of the subject property. The north-south trending road adjoining the west of the subject property is depicted as Cherry Avenue. An apparent east-west trending transmission line easement appears to intersect the central portion of the subject property. Additionally, an east-west to northwest-southeast pipeline easement appears to intersect the southern portion of the subject property. This pipeline appears to be the active Southern California Natural Gas line discussed above.
1972 1979 1988	The 1972 topographic map depicted the development of several structures, including a trailer park, to the west of Cherry Avenue. The transmission line easement that crosses the subject property now is depicted with an additional transmission line.
2012 2015 2018 2021	The 1979 topographic map detailed an additional transmission line, paralleling the existing two transmission lines, intersecting the central portion of the subject property. The topographic maps from 2012 to 2021 did not depict buildings, as these topographic maps primarily focused on the road network and regional topography. The 2021 topographic map depicted additional roads in the adjacent property to the northeast of the subject property.

4.3.5 Building Department Records

On August 1, 2024, Ninyo & Moore requested records from the City of Beaumont Clerk’s Office for the subject property APNs 408-250-034, 408-240-038, 408-100-025, 408-100-024, 408-090-066, 419-690-030 and adjoining properties. A representative for the City of Beaumont Department of Building & Safety provided two inspection records dated May 03, 2007 and November 27, 2007 pertaining to the onsite electrical installation of a street light electrical pad and an irrigation meter. The documents did not provide information pertinent to this report.

4.4 Previous Reports

The client provided Ninyo & Moore with a Deutsch Specific Plan Environmental Report (EIR) by STA Planning, Incorporated (STA), dated September 20, 2006. The 2006 STA EIR report detailed potential environmental impacts that nearby development could have on the 1,162-acre area bounded by Brookside Avenue to the north, Highland Springs Avenue to the east, 8<sup>th</sup> Street to the south, and Cherry Avenue to the west. The EIR noted that runoff would increase once the land was developed due to less permeable surfaces replacing soil. The Sundance Specific Plan, an

amendment to the Deutsch Specific Plan, by Michael Baker International, dated May 1, 2018, outlined the development of the Sundance community, which consists of residential housing and community facilities. The development of this community included the addition of the Cherry Channel to address flood hazards.

#### **4.5 Adjoining Property History**

In 1901, all adjoining properties were not depicted with developments. By 1943, agricultural operations and agriculture related buildings were located on adjacent properties to the north, south, and west of the subject property. By 1956, a transmission line running from east to west intersected adjacent properties. Housing communities and a school were developed by 1972, in addition to another transmission line. From 1979 to 2020, residential housing was developed in adjacent parcels to the subject property. The transmission line easement remained constant from 1956 to present. However, it was not until 2020 when the adjoining properties to the west achieved their currently observed development.

### **5 PRELIMINARY VAPOR ENCROACHMENT SCREENING**

Ninyo & Moore conducted a preliminary vapor encroachment screen (pVES) for potential chemicals of concern (COCs) that may migrate as vapors onto the subject property as a result of contaminated soil and/or groundwater near the subject property. The purpose of the pVES is to identify a vapor encroachment condition (VEC), which is the presence or likely presence of COC vapors in subsurface soils at the subject property caused by the release of vapors from contaminated soil or groundwater either on or near the subject property. The potential for VEC beneath the subject property was evaluated using a Vapor Encroachment Screening Matrix (VESM). The VESM included performing a Search Distance Test to identify if there are any known or suspect contaminated sites surrounding or upgradient of the subject property within specific search radii, a COC Test (for those known or suspect contaminated sites identified within the Search Distance Test) to evaluate whether or not COCs are likely to be present, and a Critical Distance Test to evaluate whether or not COCs in a contaminated plume may be within the critical distance of the subject property (100 feet for non-petroleum contaminants, and 30 feet for petroleum hydrocarbon contaminants). Based on the results of the VESM, it is unlikely that a VEC exists beneath the subject property. A copy of the VESM is included in Appendix F.

### **6 SUBJECT PROPERTY RECONNAISSANCE**

The objective of the subject property reconnaissance was to obtain information indicating the potential for RECs in connection with the subject property. Ms. Kelsey Hilton conducted the subject property reconnaissance on July 29, 2024. A site plan of the subject property is provided as Figure 2, and photographic documentation is provided in Appendix A.

## 6.1 Methodology and Limiting Conditions

Overgrown vegetation prevented the inspection of the bottom of the Channel for soil staining. Other limiting conditions were not encountered during the subject property reconnaissance.

## 6.2 General Subject Property Setting

At the time of the subject property reconnaissance, the subject property was used as a drainage channel at APNs 408-250-034, 408-240-038, 408-090-066, 408-100-025, 408-100-024, and 419-690-030. Ninyo & Moore observed several concrete pipe culverts that fed water into the drainage. In addition to the drainage channel that parallels Cherry Avenue, APN 408-090-066 is part of an Southern California Edison Easement that contains two parking lots, two transmission towers, and a walking path. Electrical transmission lines were observed spanning over the section of the Channel located within APN 208-090-066. Access to the parking lot was provided through a driveway that extended from Cherry Avenue, over the Channel. *De minimis* tire marks were observed within the parking lot. Between the APNs 408-100-025 and 408-100-024, an additional driveway that extended from Cherry Avenue, over the Channel, and to a residential complex was observed. East Oak Valley Parkway intersected the south of the site, between APNs 408-100-024 and 419-690-030. The driveways and streets were constructed on concrete culvert with rip rap (boulders) to the north and south of the culverts. The culvert under Cougar Way did not have rip rap. Vegetation and surficial runoff water were observed within the Channel. A water sprinkler system was observed along the edge of the Channel. Various utility access boxes and sprinkler pumps were observed onsite. *De minimis* trash/debris was also observed within the Channel.

## 6.3 Adjoining Property Observations

Adjoining properties were observed from the subject property and from publicly accessible vantage points (e.g., streets, sidewalks) during the subject property reconnaissance. The properties adjacent to the subject property are as follows and as depicted on Figure 2:

- **North:** Sundance neighborhood, located along Cougar Way and Cherry Avenue.
- **South:** Continuation of the drainage channel and residential neighborhoods.
- **East:** Neighborhoods, a parking lot, a transmission lines easement, and a walkway; Albert A. Chatigny Community Center at 1310 East Oak Valley.
- **West:** San Geronio Middle School at 1591 Cherry Avenue, Unit 5121; Beaumont Adult School at 1575 Cherry Avenue; neighborhoods along Cherry Avenue, an electrical easement with transmission towers, and Country Highlands Trailer Park at 1425 Cherry Avenue.

## 6.4 Subject Property Observations

Ninyo & Moore evaluated the subject property for evidence of the following potential environmental concerns:

**Table 9 – On-Subject Property Observations**

Conditions	Observed or Noted	Comments
Hazardous Substances/Petroleum Products		Not observed.
Waste Generation/Storage/Disposal		Not observed.
ASTs		Not observed.
Potential Evidence of USTs		Not observed.
Potential PCB-Containing Equipment		Not observed.
Chemical/Petroleum Odors		Not observed.
Concrete Patches/Pads		Not observed.
Pools of Liquid	X	Runoff water from surrounding developments was present within the Channel.
Sewage Discharge Pipes	X	Multiple concrete culverts were observed connecting to the Cherry Channel.
Floor Drains/Sumps		Not observed.
Elevator		Not observed.
Wells		Not observed.
Drums		Not observed.
Unidentified Substance Containers		Not observed.
Stained Soil or Pavement		Not observed.
Stressed Vegetation		Not observed.
Pits, Ponds, or Lagoons		Not observed.
Wastewater Discharges Disposal Systems		Not observed.
Septic Systems/Cesspools		Not observed.
Municipal Solid Waste Disposal Areas		Not observed.

## 7 INTERVIEWS

Interviews were conducted by Ninyo & Moore with the objective of obtaining information regarding potential RECs in connection with the subject property. Interviews with present owners, operators, and/or occupants of the subject property, as well as other knowledgeable parties as appropriate, is mandated by ASTM E 1527-21. A summary of the interviews conducted is provided in the table below.

**Table 10 – Interviews**

Representative	Summary
Property Owner/ Key Subject Property Manager	Ninyo & Moore provided a user questionnaire to Mr. Vincent Lopez, Project Manager at the City of Beaumont, which is the owner of the subject property. Mr. Lopez signed and returned the user questionnaire back to Ninyo & Moore on July 29, 2024. Mr. Vincent Lopez has no knowledge of environmental cleanup liens against the property or recorded under federal, state, county, or tribal law. Mr. Lopez is not aware of any activity use limitations, engineering controls, or institutional controls leveraged against the subject property. Mr. Lopez states that the purpose of this Phase I was because the City of Beaumont is proposing to line the Cherry Channel with concrete.
Past Owners	Past ownership entities were not made available to Ninyo & Moore during the preparation of this ESA. Therefore, interviews with past subject property owners were not conducted.
Occupants	At the time of the investigation, the Channel did not have occupants. Therefore, interviews with historical/current occupants were not conducted.

## 8 FINDINGS

Based upon the results of this Phase I ESA, the following findings are provided.

- The subject property consists of six parcels of land located east of Cherry Avenue and south of Cougar Way in Beaumont, California (Figure 1). The subject property is comprised of the Riverside County APNs 408-250-034, 408-240-038, 408-090-066, 408-100-025, 408-100-024, and 419-690-030.
- The subject property has remained a drainage channel and access road since 2006. Prior to being developed, the parcels were adjacent to agricultural parcels.
- The subject property was not listed in the HTWS, HAZNET, RGA LUST, LUST, UST FINDER RELEASE, CORTESE, HIST CORTESE, CA HIST UST, WDR, CERS, FINDS, HIST UST, UST, HAULERS, RCRA NonGen/NLR, ECHO, and AST databases as searched by EDR.
- Several near off-site properties have had recorded instances of spill/releases of petroleum hydrocarbon products. The environmental cases have been issued a no further action letter by the relevant regulatory oversight agency or are not located upgradient of the site and therefore no off-site properties represent an environmental concern to the subject property.
- Although not a REC, an active natural gas pipeline (pipeline ID 49082), operated by Southern California Gas CO., trending from the west to southeast, intersects the subject property at the intersection of Cherry Avenue and East Oak Valley Parkway. Records concerning spills or releases from these pipelines were not plotted within the vicinity of the subject property on the website (NPMS, 2024). Additionally, the pipeline appears on EDR topographic maps starting in 1953.

## 9 OPINIONS

The rationale for concluding whether or not the conditions listed in Section 8, above, do not represent RECs, HRECs, or CRECs (i.e., the presence or likely presence of hazardous substances or petroleum products on a property under conditions indicative of releases, past releases, or a material threat of a release of hazardous substances, pollutants, contaminants, and/or petroleum/petroleum products at the subject property) is provided below.

### 9.1 RECs

The subject property appeared to be historically utilized as agricultural land from 1938 until approximately 2006 in the EDR Aerial Photographs and contained a natural drainage that may have been impacted by water from surrounding agricultural operations. The historic agricultural usage presents potential for agricultural chemicals (pesticides, herbicides, fertilizers, ect.) to have impacted the subject property. Residual concentrations of these substances and/or their breakdown derivatives may be present in the subject property soils. Based on review of the EDR historical aerials, the historical agricultural at the subject property and at adjacent properties were no longer present by 2006, with the exception of a farm to the southwest of property. Based on our experience and the duration since pesticides/herbicides may have been applied (more than

50 years), it is our opinion that the former agricultural usage of the subject property is considered a REC.

## 9.2 CRECs

CRECs were not encountered during the preparation of this report.

## 9.3 HRECs

HRECs were not encountered during the preparation of this report.

## 9.4 De Minimis Conditions

Minor trash and debris were observed throughout the subject property. The presence of minor trash and debris on the subject property are considered a *de minimis* condition.

The development of the Channel began in approximately 2006, and has since been used to collect runoff from the surrounding residential developments and road networks. Because of the runoff collection, there is potential for petroleum and petroleum products to be present, which is considered a *de minimis* condition.

## 9.5 Data Gaps

Data gaps were not encountered during the preparation of this Phase I ESA.

# 10 CONCLUSIONS

Ninyo & Moore has performed a Phase I ESA, in conformance with the scope and limitations of the ASTM Practice E 1527-21, for the subject property with Riverside County APNs 408-250-034, 408-240-038, 408-090-066, 408-100-025, 408-100-024, and 419-690-030 (Riverside County.) This Phase I ESA has revealed a REC to the subject property due to former usage in agricultural operations from at least 1938 to approximately 2006 which may have impacted the subject property with agricultural chemicals and their breakdown byproducts.

## 12 PROFESSIONAL STATEMENT

As required by 40 Code of Federal Regulations (CFR) §312.21(d) and Section 12.13 of ASTM 1527-21, the following statement is included:

*I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined by §312.10 of 40 CFR 312. I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.*

---

**Jeff Aguilar, PG**  
Principal Geologist

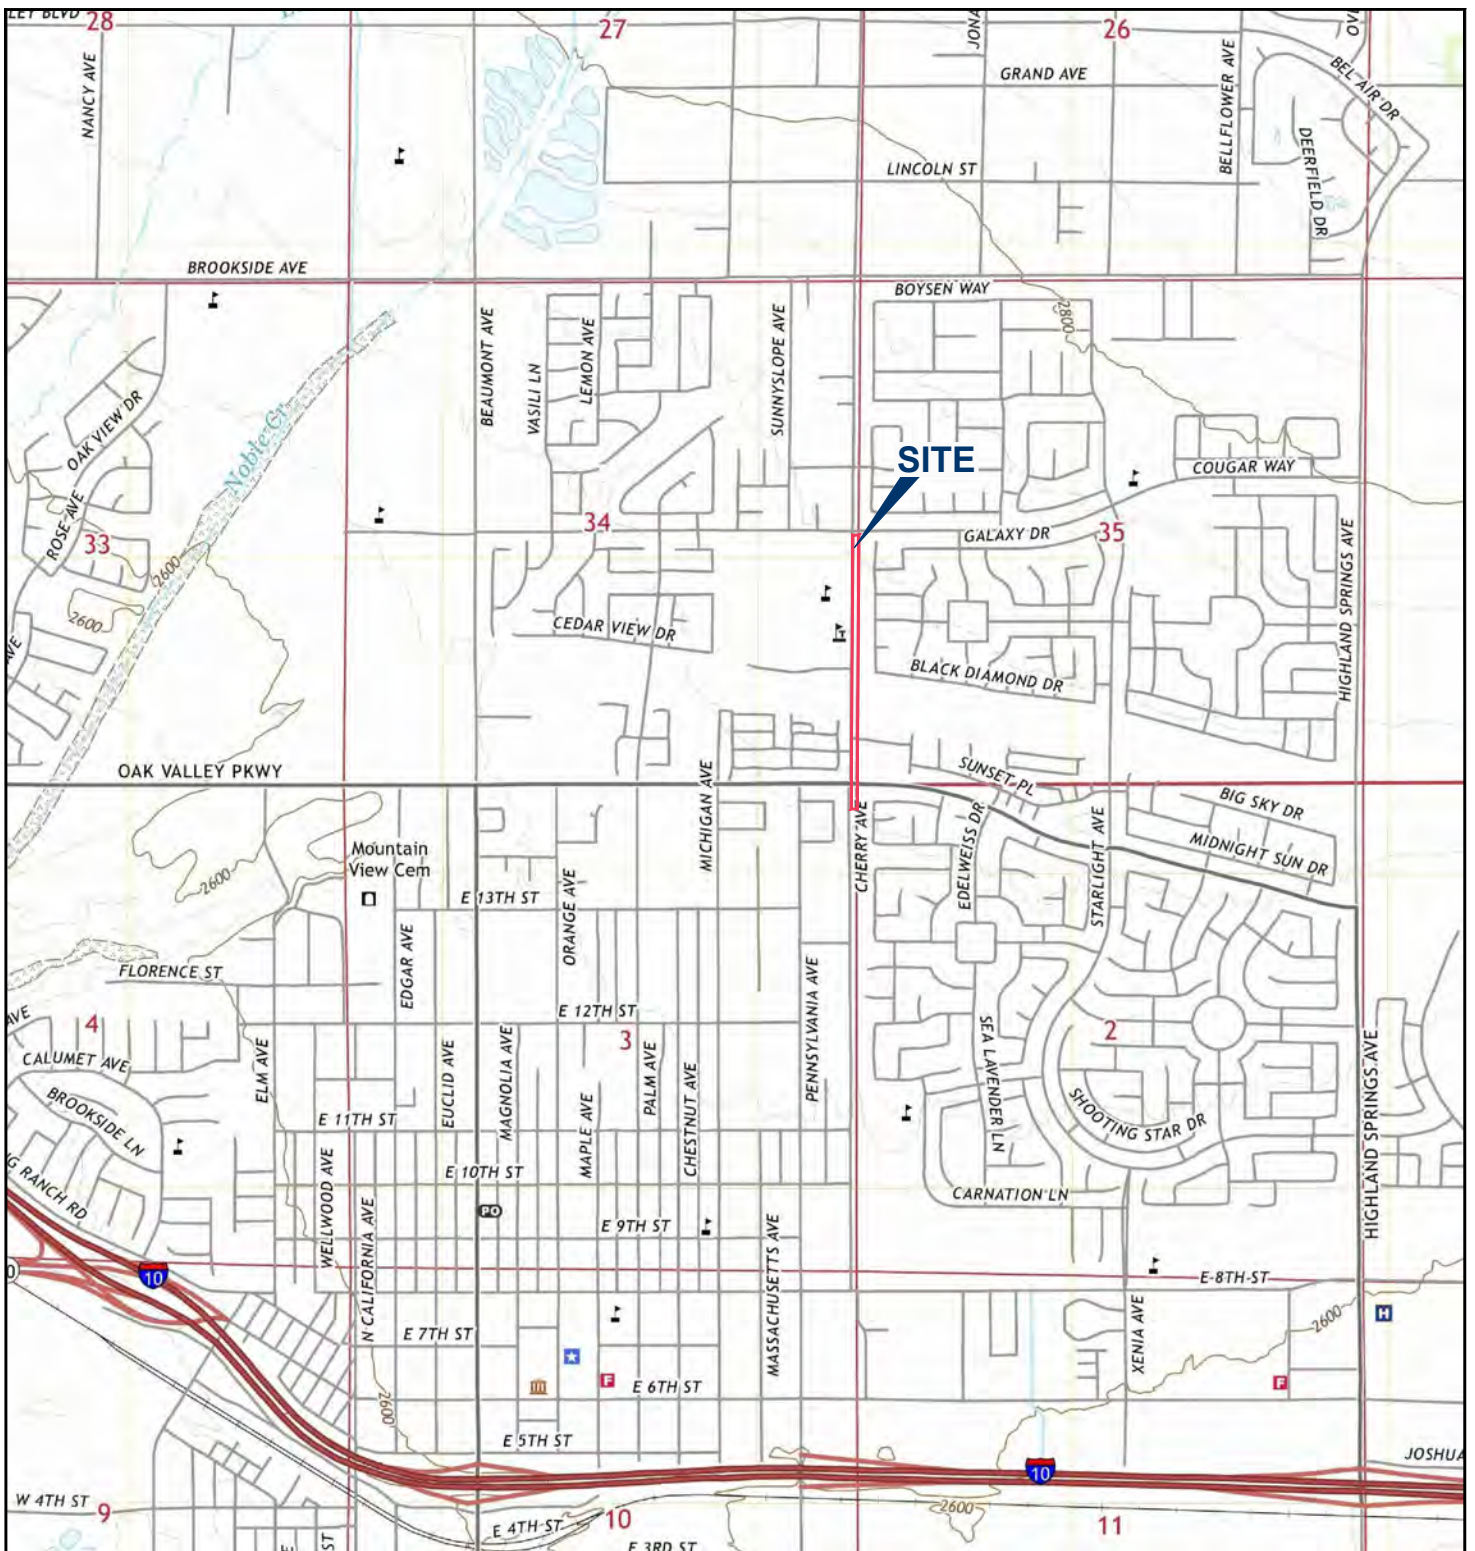

## 13 QUALIFICATIONS OF ENVIRONMENTAL PROFESSIONAL

Resumes, which document the professional qualifications, pursuant to 40 CFR §312.10(b)(2), of the persons that prepared and reviewed this report are provided as Appendix G.

## User and Property Owner Provided Information

**PHASE I ESA  
USER  
QUESTIONNAIRE**

Property Name/Address:

Please respond to all of the following questions to the best of your knowledge. The purpose of this questionnaire is to assist the user (the client or party seeking to use the Phase I ESA) and the environmental professional in gathering information from the user that may be material to documenting Recognized Environmental Conditions (RECs) at the site. Please note that the user of the Phase I ESA (the client), if seeking protection from CERCLA liability, must adhere to a set of user responsibilities as defined by the American Society for Testing and Materials (ASTM) Standard Practice E1527-21 and the United States Environmental Protection Agency (EPA) 40 Code of Federal Regulations Part 312 titled "Standards and Practices for all Appropriate Inquiries (AAI)". Failure to provide this information could result in a determination that AAI is not complete.

Per ASTM Standard E1527-21 and 40 CFR Part 312 of the AAI rule, the user's responsibilities include, but are not limited to, the following:

- review reasonably ascertainable land title records, lien records, and/or judicial records to search for environmental cleanup liens or activity and use limitations (AULs) against the site filed or recorded under federal, tribal, state, or local law, or engage a title company to review such records. Evidence of environmental liens and/or activity and use limitations on the site, if discovered, must be provided to the environmental consultant;
- report to the environmental professional specialized knowledge or experience material to RECs in connection with the property;
- report to the environmental professional knowledge of environmental liens or AULs encumbering or in connection with the property;
- consider the relationship of the purchase price of the property to its fair market value and whether a lower purchase price is related to potential contamination;
- report to the environmental professional commonly known or reasonably ascertainable information material to RECs; and
- report to the environmental professional the reason for conducting the Phase I ESA.

User responsibilities, CERCLA liability relief, and AAI components are discussed in the AAI rule and in the ASTM E1527-05 standard.

**1) Environmental cleanup liens that are filed or recorded against the site (40 CFR 312.25).**

1a. Have you conducted a search for environmental cleanup liens that are filed or recorded under federal, tribal, state or local law?

Yes      No      If yes, please describe:

1b. Are you aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state or local law?

Yes      No      If yes, please describe:

**2) Activity and land use limitations (AULs) that are in place on the site or that have been filed or recorded in a registry.**

2a. Have you conducted a search for the existence of AULs, such as engineering controls, land use restrictions or institutional controls, that have been filed or recorded in a registry under federal, tribal, state or local law?

Yes      No      If yes, please describe:

2b. Are you aware of any AULs that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state or local law?

Yes      No      If yes, please describe:

**3) Specialized knowledge or experience of the person seeking to qualify for the liability protections (40 CFR 312.28).**

As the user of this Phase I ESA do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?

Yes      No      If yes, please describe:

**4) Relationship of the purchase price to the fair market value of the property if it were not contaminated (40 CFR 312.29).**

4a. Does the purchase price being paid for this property reasonably reflect the fair market value of the property?

Yes      No      Not applicable (No Property Purchase Involved)

4b. If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?

Yes      No      If yes, please describe:

**5) Commonly known or reasonably ascertainable information about the property (40 CFA 312.30).**

Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example, as the user,

a) Do you know the past uses of the property?

Yes No If yes, please describe:

b) Do you know of specific chemicals that are present or once were present at the property?

Yes No If yes, please describe:

c) Do you know of spills or other chemical releases that have taken place at the property?

Yes No If yes, please describe:

d) Do you know of any environmental cleanups that have taken place at the property?

Yes No If yes, please describe:

**6) The degree of obviousness of the presence of likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31).**

As the user of this ESA, based on your knowledge and experience related to the property are there any obvious indicators that point to the presence or likely presence of contamination at the property?

Yes No If yes, please describe:

**7) What is the reason for having the Phase I ESA performed (ASTM 1527-21)?**

**8) Are you aware of any previously prepared documentation for the site, such as:**

- previous Phase I ESA or Phase II ESA reports
- environmental sampling, compliance audit, or assessment reports
- environmental permits
- registrations for aboveground or underground storage tanks
- registrations for underground injections systems
- material safety data sheets (MSDS)
- community right-to-know plans,
- safety plans; preparedness and prevention plans; spill prevention, countermeasure, and control plans
- geotechnical or hydrogeologic reports
- storm water documents
- risk assessments
- hazardous waste generator notices

## EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

## EXECUTIVE SUMMARY

### TARGET PROPERTY SEARCH RESULTS

The target property was not listed in any of the databases searched by EDR.

### DATABASES WITH NO MAPPED SITES

No mapped sites were found in EDR's search of available ("reasonably ascertainable ") government records either on the target property or within the search radius around the target property for the following databases:

### STANDARD ENVIRONMENTAL RECORDS

#### ***Lists of Federal NPL (Superfund) sites***

NPL..... National Priority List  
Proposed NPL..... Proposed National Priority List Sites  
NPL LIENS..... Federal Superfund Liens

#### ***Lists of Federal Delisted NPL sites***

Delisted NPL..... National Priority List Deletions

#### ***Lists of Federal sites subject to CERCLA removals and CERCLA orders***

FEDERAL FACILITY..... Federal Facility Site Information listing  
SEMS..... Superfund Enterprise Management System

#### ***Lists of Federal CERCLA sites with NFRAP***

SEMS-ARCHIVE..... Superfund Enterprise Management System Archive

#### ***Lists of Federal RCRA facilities undergoing Corrective Action***

CORRACTS..... Corrective Action Report

#### ***Lists of Federal RCRA TSD facilities***

RCRA-TSDF..... RCRA - Treatment, Storage and Disposal

#### ***Lists of Federal RCRA generators***

RCRA-LQG..... RCRA - Large Quantity Generators  
RCRA-SQG..... RCRA - Small Quantity Generators  
RCRA-VSQG..... RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

#### ***Federal institutional controls / engineering controls registries***

LUCIS..... Land Use Control Information System

## EXECUTIVE SUMMARY

US ENG CONTROLS..... Engineering Controls Sites List  
US INST CONTROLS..... Institutional Controls Sites List

### ***Federal ERNS list***

ERNS..... Emergency Response Notification System

### ***Lists of state- and tribal (Superfund) equivalent sites***

RESPONSE..... State Response Sites

### ***Lists of state and tribal landfills and solid waste disposal facilities***

SWF/LF..... Solid Waste Information System

### ***Lists of state and tribal leaking storage tanks***

INDIAN LUST..... Leaking Underground Storage Tanks on Indian Land

### ***Lists of state and tribal registered storage tanks***

FEMA UST..... Underground Storage Tank Listing  
UST..... Active UST Facilities  
INDIAN UST..... Underground Storage Tanks on Indian Land

### ***Lists of state and tribal voluntary cleanup sites***

INDIAN VCP..... Voluntary Cleanup Priority Listing  
VCP..... Voluntary Cleanup Program Properties

### ***Lists of state and tribal brownfield sites***

BROWNFIELDS..... Considered Brownfields Sites Listing

## **ADDITIONAL ENVIRONMENTAL RECORDS**

### ***Local Brownfield lists***

US BROWNFIELDS..... A Listing of Brownfields Sites

### ***Local Lists of Landfill / Solid Waste Disposal Sites***

WMUDS/SWAT..... Waste Management Unit Database  
SWRCY..... Recycler Database  
HAULERS..... Registered Waste Tire Haulers Listing  
INDIAN ODI..... Report on the Status of Open Dumps on Indian Lands  
DEBRIS REGION 9..... Torres Martinez Reservation Illegal Dump Site Locations  
ODI..... Open Dump Inventory  
IHS OPEN DUMPS..... Open Dumps on Indian Land

### ***Local Lists of Hazardous waste / Contaminated Sites***

US HIST CDL..... Delisted National Clandestine Laboratory Register  
HIST Cal-Sites..... Historical Calsites Database

## EXECUTIVE SUMMARY

CDL..... Clandestine Drug Labs  
Toxic Pits..... Toxic Pits Cleanup Act Sites  
US CDL..... National Clandestine Laboratory Register

### **Local Lists of Registered Storage Tanks**

CA FID UST..... Facility Inventory Database

### **Local Land Records**

LIENS..... Environmental Liens Listing  
LIENS 2..... CERCLA Lien Information  
DEED..... Deed Restriction Listing

### **Records of Emergency Release Reports**

HMIRS..... Hazardous Materials Information Reporting System  
CHMIRS..... California Hazardous Material Incident Report System  
LDS..... Land Disposal Sites Listing  
MCS..... Military Cleanup Sites Listing  
SPILLS 90..... SPILLS 90 data from FirstSearch

### **Other Ascertainable Records**

FUDS..... Formerly Used Defense Sites  
DOD..... Department of Defense Sites  
SCRD DRYCLEANERS..... State Coalition for Remediation of Drycleaners Listing  
US FIN ASSUR..... Financial Assurance Information  
EPA WATCH LIST..... EPA WATCH LIST  
2020 COR ACTION..... 2020 Corrective Action Program List  
TSCA..... Toxic Substances Control Act  
TRIS..... Toxic Chemical Release Inventory System  
SSTS..... Section 7 Tracking Systems  
ROD..... Records Of Decision  
RMP..... Risk Management Plans  
RAATS..... RCRA Administrative Action Tracking System  
PRP..... Potentially Responsible Parties  
PADS..... PCB Activity Database System  
ICIS..... Integrated Compliance Information System  
FTTS..... FIFRA/ TSCA Tracking System - FIFRA (Federal Insecticide, Fungicide, & Rodenticide Act)/TSCA (Toxic Substances Control Act)  
MLTS..... Material Licensing Tracking System  
COAL ASH DOE..... Steam-Electric Plant Operation Data  
COAL ASH EPA..... Coal Combustion Residues Surface Impoundments List  
PCB TRANSFORMER..... PCB Transformer Registration Database  
RADINFO..... Radiation Information Database  
HIST FTTS..... FIFRA/TSCA Tracking System Administrative Case Listing  
DOT OPS..... Incident and Accident Data  
CONSENT..... Superfund (CERCLA) Consent Decrees  
INDIAN RESERV..... Indian Reservations  
FUSRAP..... Formerly Utilized Sites Remedial Action Program  
UMTRA..... Uranium Mill Tailings Sites  
LEAD SMELTERS..... Lead Smelter Sites  
US AIRS..... Aerometric Information Retrieval System Facility Subsystem  
US MINES..... Mines Master Index File

## EXECUTIVE SUMMARY

MINES MRDS.....	Mineral Resources Data System
ABANDONED MINES.....	Abandoned Mines
FINDS.....	Facility Index System/Facility Registry System
ECHO.....	Enforcement & Compliance History Information
UXO.....	Unexploded Ordnance Sites
DOCKET HWC.....	Hazardous Waste Compliance Docket Listing
FUELS PROGRAM.....	EPA Fuels Program Registered Listing
PFAS NPL.....	Superfund Sites with PFAS Detections Information
PFAS FEDERAL SITES.....	Federal Sites PFAS Information
PFAS TSCA.....	PFAS Manufacture and Imports Information
PFAS TRIS.....	List of PFAS Added to the TRI
PFAS RCRA MANIFEST.....	PFAS Transfers Identified In the RCRA Database Listing
PFAS ATSDR.....	PFAS Contamination Site Location Listing
PFAS WQP.....	Ambient Environmental Sampling for PFAS
PFAS NPDES.....	Clean Water Act Discharge Monitoring Information
PFAS PROJECT.....	NORTHEASTERN UNIVERSITY PFAS PROJECT
PFAS ECHO.....	Facilities in Industries that May Be Handling PFAS Listing
PFAS ECHO FIRE TRAIN.....	Facilities in Industries that May Be Handling PFAS Listing
PFAS PT 139 AIRPORT.....	All Certified Part 139 Airports PFAS Information Listing
AQUEOUS FOAM NRC.....	Aqueous Foam Related Incidents Listing
BIOSOLIDS.....	ICIS-NPDES Biosolids Facility Data
UST FINDER.....	UST Finder Database
PFAS.....	PFAS Investigation Site Location Listing
AQUEOUS FOAM.....	Former Fire Training Facility Assessments Listing
CA BOND EXP. PLAN.....	Bond Expenditure Plan
CHROME PLATING.....	Chrome Plating Facilities Listing
CUPA Listings.....	CUPA Resources List
DRYCLEANERS.....	Cleaner Facilities
EMI.....	Emissions Inventory Data
ENF.....	Enforcement Action Listing
Financial Assurance.....	Financial Assurance Information Listing
ICE.....	Inspection, Compliance and Enforcement
HWP.....	EnviroStor Permitted Facilities Listing
HWT.....	Registered Hazardous Waste Transporter Database
HWTS.....	Hazardous Waste Tracking System
HAZNET.....	Facility and Manifest Data
MINES.....	Mines Site Location Listing
MWMP.....	Medical Waste Management Program Listing
NPDES.....	NPDES Permits Listing
PEST LIC.....	Pesticide Regulation Licenses Listing
PROC.....	Certified Processors Database
HAZMAT.....	Hazardous Material Facilities
UIC.....	UIC Listing
UIC GEO.....	UIC GEO (GEOTRACKER)
WASTEWATER PITS.....	Oil Wastewater Pits Listing
WDS.....	Waste Discharge System
WIP.....	Well Investigation Program Case List
MILITARY PRIV SITES.....	MILITARY PRIV SITES (GEOTRACKER)
PROJECT.....	PROJECT (GEOTRACKER)
WDR.....	Waste Discharge Requirements Listing
CIWQS.....	California Integrated Water Quality System
CERS.....	CERS
NON-CASE INFO.....	NON-CASE INFO (GEOTRACKER)
OTHER OIL GAS.....	OTHER OIL & GAS (GEOTRACKER)
PROD WATER PONDS.....	PROD WATER PONDS (GEOTRACKER)

## EXECUTIVE SUMMARY

### SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

### STANDARD ENVIRONMENTAL RECORDS

#### ***Lists of state- and tribal hazardous waste facilities***

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 01/22/2024 has revealed that there are 5 ENVIROSTOR sites within approximately 1 mile of the target property.

## EXECUTIVE SUMMARY

CPS-SLIC: Cleanup Program Sites (CPS; also known as Site Cleanups [SC] and formerly known as Spills, Leaks, Investigations, and Cleanups [SLIC] sites) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the CPS-SLIC list, as provided by EDR, has revealed that there is 1 CPS-SLIC site within approximately 0.5 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

### **ADDITIONAL ENVIRONMENTAL RECORDS**

#### ***Local Lists of Hazardous waste / Contaminated Sites***

SCH: This category contains proposed and existing school sites that are being evaluated by DTSC for possible hazardous materials contamination. In some cases, these properties may be listed in the CalSites category. depending on the level of threat to public health and safety or the environment they pose.

A review of the SCH list, as provided by EDR, and dated 01/22/2024 has revealed that there is 1 SCH site within approximately 0.25 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

## EXECUTIVE SUMMARY

### Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 06/03/2024 has revealed that there are 7 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

<b>CHRISTOPHER BOYD FUN</b> EPA ID:: CAC003138493	<b>1345 MASSACHUSETTS A</b>	<b>SSW 1/8 - 1/4 (0.219 mi.)</b>	<b>10</b>	<b>58</b>

UST FINDER RELEASE: US EPA's UST Finder data is a national composite of leaking underground storage tanks. This data contains information about, and locations of, leaking underground storage tanks. Data was collected from state sources and standardized into a national profile by EPA's Office of Underground Storage Tanks, Office of Research and Development, and the Association of State and Territorial Solid Waste Management Officials.

A review of the UST FINDER RELEASE list, as provided by EDR, and dated 06/08/2023 has revealed that there is 1 UST FINDER RELEASE site within approximately 0.5 miles of the target property.

BEAUMONT-CHERRY VALL	11083 CHERRY AVE	N 1/4 - 1/2 (0.421 mi.)	D14	69

E MANIFEST: EPA established a national system for tracking hazardous waste shipments electronically. This system, known as e-Manifest, will modernize the nation's cradle-to-grave hazardous waste tracking process while saving valuable time, resources, and dollars for industry and states.

A review of the E MANIFEST list, as provided by EDR, and dated 07/24/2023 has revealed that there are 3 E MANIFEST sites within approximately 0.25 miles of the target property.

## EXECUTIVE SUMMARY

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
<b>LLOYD SMITH</b>	<b>11265 CHERRY AVE</b>	<b>N 1/8 - 1/4 (0.240 mi.)</b>	<b>11</b>	<b>62</b>
<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

Violation Description: Chapter 12, Section(s) 66262.40(a)  
Failure to keep a copy of each properly signed manifest for at least three years from the date the waste was accepted by the initial transporter. The manifest signed at the time the waste was accepted for transport shall be kept until receiving a signed copy from the designated facility which received the waste.

Violation Notes: Returned to compliance on 04/26/2019. OBSERVATION: Manifests from 2016 and 2017 were not available during inspection. CORRECTIVE ACTION: Owner/operator shall obtain all manifests for hazardous waste shipments which occurred in the past 3 years. Manifests shall be made available for inspection. Copies of manifests can be emailed to rsgarcia@rivco.org.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

## **STANDARD ENVIRONMENTAL RECORDS**

### ***Lists of Federal NPL (Superfund) sites***

#### **NPL: National Priority List**

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 05/22/2024	Source: EPA
Date Data Arrived at EDR: 06/03/2024	Telephone: N/A
Date Made Active in Reports: 06/26/2024	Last EDR Contact: 07/02/2024
Number of Days to Update: 23	Next Scheduled EDR Contact: 10/07/2024
	Data Release Frequency: Quarterly

#### **Proposed NPL: Proposed National Priority List Sites**

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 05/22/2024	Source: EPA
Date Data Arrived at EDR: 06/03/2024	Telephone: N/A
Date Made Active in Reports: 06/26/2024	Last EDR Contact: 07/01/2024
Number of Days to Update: 23	Next Scheduled EDR Contact: 10/07/2024
	Data Release Frequency: Quarterly

#### **NPL LIENS: Federal Superfund Liens**

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Date of Government Version: 10/15/1991  
Date Data Arrived at EDR: 02/02/1994

Next Scheduled EDR Contact: 11/28/2011  
Data Release Frequency: No Update Planned

### ***Lists of Federal Delisted NPL sites***

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 05/22/2024  
Date Data Arrived at EDR: 06/03/2024  
Date Made Active in Reports: 06/26/2024

Data Release Frequency: Quarterly

### ***Lists of Federal sites subject to CERCLA removals and CERCLA orders***

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 03/25/2024  
Date Data Arrived at EDR: 03/26/2024  
Date Made Active in Reports: 06/24/2024  
Number of Days to Update: 90

Source: Environmental Protection Agency  
Telephone: 703-603-8704  
Last EDR Contact: 06/25/2024  
Next Scheduled EDR Contact: 10/07/2024  
Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 04/22/2024  
Date Data Arrived at EDR: 05/01/2024  
Date Made Active in Reports: 05/24/2024  
Number of Days to Update: 23

Telephone: 800-424-9346  
Last EDR Contact: 07/01/2024  
Next Scheduled EDR Contact: 10/21/2024  
Data Release Frequency: Quarterly

### ***Lists of Federal CERCLA sites with NFRAP***

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 04/22/2024	Source: EPA
Date Data Arrived at EDR: 05/01/2024	Telephone: 800-424-9346
Date Made Active in Reports: 05/24/2024	Last EDR Contact: 07/01/2024
Number of Days to Update: 23	Next Scheduled EDR Contact: 10/21/2024
	Data Release Frequency: Quarterly

### ***Lists of Federal RCRA facilities undergoing Corrective Action***

CORRACTS: Corrective Action Report

CORRACTS identifies hazardous waste handlers with RCRA corrective action activity.

Date of Government Version: 06/03/2024	Source: EPA
Date Data Arrived at EDR: 06/07/2024	Telephone: 800-424-9346
Date Made Active in Reports: 06/20/2024	Last EDR Contact: 06/07/2024
Number of Days to Update: 13	Next Scheduled EDR Contact: 09/30/2024
	Data Release Frequency: Quarterly

### ***Lists of Federal RCRA TSD facilities***

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 06/03/2024	Source: Environmental Protection Agency
Date Data Arrived at EDR: 06/07/2024	Telephone: (415) 495-8895
Date Made Active in Reports: 06/20/2024	Last EDR Contact: 06/07/2024
Number of Days to Update: 13	Next Scheduled EDR Contact: 09/30/2024
	Data Release Frequency: Quarterly

### ***Lists of Federal RCRA generators***

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 06/03/2024	Source: Environmental Protection Agency
Date Data Arrived at EDR: 06/07/2024	Telephone: (415) 495-8895
Date Made Active in Reports: 06/20/2024	Last EDR Contact: 06/07/2024
Number of Days to Update: 13	Next Scheduled EDR Contact: 09/30/2024
	Data Release Frequency: Quarterly

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

### RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 06/03/2024	Source: Environmental Protection Agency
Date Data Arrived at EDR: 06/07/2024	Telephone: (415) 495-8895

### RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 06/03/2024	Source: Environmental Protection Agency
Date Data Arrived at EDR: 06/07/2024	Telephone: (415) 495-8895
Date Made Active in Reports: 06/20/2024	Last EDR Contact: 06/07/2024
Number of Days to Update: 13	Next Scheduled EDR Contact: 09/30/2024

### ***Federal institutional controls / engineering controls registries***

#### LUCIS: Land Use Control Information System

LUCIS contains records of land use control information pertaining to the former Navy Base Realignment and Closure properties.

Date of Government Version: 02/14/2024	Source: Department of the Navy
Date Data Arrived at EDR: 02/16/2024	Telephone: 843-820-7326
Date Made Active in Reports: 04/04/2024	Last EDR Contact: 05/17/2024
Number of Days to Update: 48	Next Scheduled EDR Contact: 08/19/2024
	Data Release Frequency: Varies

#### US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 02/13/2024	Source: Environmental Protection Agency
Date Data Arrived at EDR: 02/21/2024	Telephone: 703-603-0695
Date Made Active in Reports: 04/04/2024	Last EDR Contact: 05/21/2024
Number of Days to Update: 43	Next Scheduled EDR Contact: 09/02/2024
	Data Release Frequency: Varies

#### US INST CONTROLS: Institutional Controls Sites List

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 02/13/2024	Source: Environmental Protection Agency
Date Data Arrived at EDR: 02/21/2024	Telephone: 703-603-0695
Date Made Active in Reports: 04/04/2024	Last EDR Contact: 05/21/2024
Number of Days to Update: 43	Next Scheduled EDR Contact: 09/02/2024
	Data Release Frequency: Varies

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## ***Federal ERNS list***

ERNS: Emergency Response Notification System

Emergency Response Notification System. ERNS records and stores information on reported releases of oil and hazardous substances.

Date of Government Version: 03/13/2024

Date Data Arrived at EDR: 03/19/2024

Date Made Active in Reports: 06/17/2024

Number of Days to Update: 90

Source: National Response Center, United States Coast Guard

Telephone: 202-267-2180

Last EDR Contact: 06/17/2024

Next Scheduled EDR Contact: 09/30/2024

Data Release Frequency: Quarterly

## ***Lists of state- and tribal (Superfund) equivalent sites***

RESPONSE: State Response Sites

Identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity.

These confirmed release sites are generally high-priority and high potential risk.

Date of Government Version: 01/22/2024

Date Data Arrived at EDR: 01/23/2024

Date Made Active in Reports: 04/08/2024

Last EDR Contact: 04/23/2024

Next Scheduled EDR Contact: 08/05/2024

Data Release Frequency: Quarterly

## ***Lists of state- and tribal hazardous waste facilities***

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

Date of Government Version: 01/22/2024

Date Data Arrived at EDR: 01/23/2024

Date Made Active in Reports: 04/08/2024

### UST CLOSURE: Proposed Closure of Underground Storage Tank (UST) Cases

UST cases that are being considered for closure by either the State Water Resources Control Board or the Executive Director have been posted for a 60-day public comment period. UST Case Closures being proposed for consideration by the State Water Resources Control Board. These are primarily UST cases that meet closure criteria under the decisional framework in State Water Board Resolution No. 92-49 and other Board orders. UST Case Closures proposed for consideration by the Executive Director pursuant to State Water Board Resolution No. 2012-0061. These are cases that meet the criteria of the Low-Threat UST Case Closure Policy. UST Case Closure Review Denials and Approved Orders.

Date of Government Version: 02/13/2024	Source: State Water Resources Control Board
Date Data Arrived at EDR: 03/05/2024	Telephone: 916-327-7844
Date Made Active in Reports: 06/03/2024	Last EDR Contact: 06/04/2024

Data Release Frequency: Quarterly

## **ADDITIONAL ENVIRONMENTAL RECORDS**

### ***Local Brownfield lists***

### **US BROWNFIELDS: A Listing of Brownfields Sites**

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

### US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 12/31/2023

#### DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Date of Government Version: 02/26/2024

California Hazardous Material Incident Reporting System. CHMIRS contains information on reported hazardous material incidents (accidental releases or spills).

Date of Government Version: 02/01/2024	Source: Office of Emergency Services
Date Data Arrived at EDR: 04/16/2024	Telephone: 916-845-8400
Date Made Active in Reports: 07/11/2024	Last EDR Contact: 04/16/2024
Number of Days to Update: 86	Next Scheduled EDR Contact: 07/29/2024
	Data Release Frequency: Semi-Annually

### LDS: Land Disposal Sites Listing (GEOTRACKER)

Land Disposal sites (Landfills) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

Date of Government Version: 03/04/2024	Source: State Water Quality Control Board
Date Data Arrived at EDR: 03/05/2024	Telephone: 866-480-1028
Date Made Active in Reports: 05/24/2024	Last EDR Contact: 06/04/2024
Number of Days to Update: 80	Next Scheduled EDR Contact: 09/16/2024
	Data Release Frequency: Quarterly

### MCS: Military Cleanup Sites Listing (GEOTRACKER)

Military sites (consisting of: Military UST sites; Military Privatized sites; and Military Cleanup sites [formerly known as DoD non UST]) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

Date of Government Version: 03/04/2024	Source: State Water Resources Control Board
Date Data Arrived at EDR: 03/05/2024	Telephone: 866-480-1028
Date Made Active in Reports: 05/24/2024	Last EDR Contact: 06/04/2024
Number of Days to Update: 80	Next Scheduled EDR Contact: 09/16/2024
	Data Release Frequency: Quarterly

### SPILLS 90: SPILLS90 data from FirstSearch

Spills 90 includes those spill and release records available exclusively from FirstSearch databases. Typically, they may include chemical, oil and/or hazardous substance spills recorded after 1990. Duplicate records that are already included in EDR incident and release records are not included in Spills 90.

Date of Government Version: 06/06/2012	Source: FirstSearch

Date Made Active in Reports: 02/22/2013	Last EDR Contact: 01/03/2013
Number of Days to Update: 50	Next Scheduled EDR Contact: N/A
	Data Release Frequency: No Update Planned

### **Other Ascertainable Records**

#### RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

### EPA WATCH LIST: EPA Watch List

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

Date of Government Version: 08/30/2013  
Date Data Arrived at EDR: 03/21/2014  
Date Made Active in Reports: 06/17/2014

Next Scheduled EDR Contact: 08/12/2024  
Data Release Frequency: No Update Planned

### 2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

Date of Government Version: 09/30/2017

Data Release Frequency: Annually

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

### ROD: Records Of Decision

Record of Decision. ROD documents mandate a permanent remedy at an NPL (Superfund) site containing technical and health information to aid in the cleanup.

Date of Government Version: 05/22/2024	Source: EPA
Date Data Arrived at EDR: 06/03/2024	Telephone: 703-416-0223
Date Made Active in Reports: 06/26/2024	Last EDR Contact: 07/01/2024
Number of Days to Update: 23	Next Scheduled EDR Contact: 09/09/2024
	Data Release Frequency: Annually

### RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

Date of Government Version: 04/01/2024	Source: Environmental Protection Agency
Date Data Arrived at EDR: 04/17/2024	Telephone: 202-564-8600
Date Made Active in Reports: 07/12/2024	Last EDR Contact: 07/11/2024
Number of Days to Update: 86	Next Scheduled EDR Contact: 10/28/2024
	Data Release Frequency: Varies

### RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995	Source: EPA
Date Data Arrived at EDR: 07/03/1995	Telephone: 202-564-4104
Date Made Active in Reports: 08/07/1995	Last EDR Contact: 06/02/2008
Number of Days to Update: 35	Next Scheduled EDR Contact: 09/01/2008
	Data Release Frequency: No Update Planned

### PRP: Potentially Responsible Parties

A listing of verified Potentially Responsible Parties

Date of Government Version: 09/19/2023	Source: EPA
Date Data Arrived at EDR: 10/03/2023	Telephone: 202-564-6023

Next Scheduled EDR Contact: 09/09/2024

Data Release Frequency: Varies

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

### PCB TRANSFORMER: PCB Transformer Registration Database

The database of PCB transformer registrations that includes all PCB registration submittals.

Date of Government Version: 09/13/2019	Source: Environmental Protection Agency
Date Data Arrived at EDR: 11/06/2019	Telephone: 202-566-0517
Date Made Active in Reports: 02/10/2020	Last EDR Contact: 05/02/2024
Number of Days to Update: 96	Next Scheduled EDR Contact: 08/12/2024
	Data Release Frequency: Varies

### RADINFO: Radiation Information Database

The Radiation Information Database (RADINFO) contains information about facilities that are regulated by U.S. Environmental Protection Agency (EPA) regulations for radiation and radioactivity.

Date of Government Version: 07/01/2019	Source: Environmental Protection Agency
Date Data Arrived at EDR: 07/01/2019	Telephone: 202-343-9775
Date Made Active in Reports: 09/23/2019	Last EDR Contact: 06/21/2024
Number of Days to Update: 84	Next Scheduled EDR Contact: 10/07/2024
	Data Release Frequency: Quarterly

### HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/01/2007	Telephone: 202-564-2501
Date Made Active in Reports: 04/10/2007	Last EDR Contact: 12/17/2007
Number of Days to Update: 40	Next Scheduled EDR Contact: 03/17/2008

Data Release Frequency: Varies

### UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

### US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

### ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

### PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST\_HANDLING\_INSTR), Non-hazardous waste description (NON\_HAZ\_WASTE\_DESCRIPTION), DOT printed information (DOT\_PRINTED\_INFORMATION), Waste line handling instructions (WASTE\_LINE\_HANDLING\_INSTR), Waste residue comments (WASTE\_RESIDUE\_COMMENTS).

### PFAS ATSDR: PFAS Contamination Site Location Listing

PFAS contamination site locations from the Department of Health & Human Services, Center for Disease Control & Prevention. ATSDR is involved at a number of PFAS-related sites, either directly or through assisting state and federal partners. As of now, most sites are related to drinking water contamination connected with PFAS production facilities or fire training areas where aqueous film-forming firefighting foam (AFFF) was regularly used.

Date of Government Version: 06/24/2020	Source: Department of Health & Human Services
Date Data Arrived at EDR: 03/17/2021	Telephone: 202-741-5770

### PFAS WQP: Ambient Environmental Sampling for PFAS

The Water Quality Portal (WQP) is a part of a modernized repository storing ambient sampling data for all environmental media and tissue samples. A wide range of federal, state, tribal and local governments, academic and non-governmental organizations and individuals submit project details and sampling results to this public repository. The information is commonly used for research and assessments of environmental quality.

Date of Government Version: 07/01/2024	Source: Environmental Protection Agency
Date Data Arrived at EDR: 07/01/2024	Telephone: 202-272-0167
Date Made Active in Reports: 07/12/2024	Last EDR Contact: 07/01/2024

	Data Release Frequency: Varies

### PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits. Caveats and Limitations: Less than half of states have required PFAS monitoring for at least one of their permittees and fewer states have established PFAS effluent limits for permittees. New rulemakings have been initiated that may increase the number of facilities monitoring for PFAS in the future.

### PFAS ECHO FIRE TRAIN: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facilities name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

### PFAS PT 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration's document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

### AQUEOUS FOAM NRC: Aqueous Foam Related Incidents Listing

The National Response Center (NRC) serves as an emergency call center that fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. The spreadsheets posted to the NRC website contain initial incident data that has not been validated or investigated by a federal/state response agency. Response center calls from 1990 to the most recent complete calendar year where there was indication of Aqueous Film Forming Foam (AFFF) usage are included in this dataset. NRC calls may reference AFFF usage in the ?Material Involved? or ?Incident Description? fields.

	Data Release Frequency: Semi-Annually

### UST FINDER: UST Finder Database

EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories. UST Finder contains information about proximity of UST facilities and LUST sites to: surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires.

### CHROME PLATING: Chrome Plating Facilities Listing

This listing represents chrome plating facilities the California State Water Resources Control Board staff identified as possibly being a source of Per- and polyfluoroalkyl substance (PFAS) contamination. Sites and locations were identified by staff with the Division of Water Quality in the California State Water Board. Data was collected from the CA Air Resources Board 2013 and 2018 - Cr VI emission survey, CA Emission Inventory, CA HAZ Waste discharge database and by reviewing storm water permits. Former chrome plating sites are also included that are open site investigation or remediation cases with the Regional Water Quality Control Boards and the Department of Toxic Substances Control.

Data Release Frequency: Quarterly

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

### HWTS: Hazardous Waste Tracking System

DTSC maintains the Hazardous Waste Tracking System that stores ID number information since the early 1980s and manifest data since 1993. The system collects both manifest copies from the generator and destination facility.

Date of Government Version: 01/26/2024  
Date Data Arrived at EDR: 01/30/2024  
Date Made Active in Reports: 04/17/2024  
Number of Days to Update: 78

Source: Department of Toxic Substances Control  
Telephone: 916-324-2444  
Last EDR Contact: 06/26/2024  
Next Scheduled EDR Contact: 10/14/2024  
Data Release Frequency: Varies

### HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

Date of Government Version: 12/31/2023  
Date Data Arrived at EDR: 04/04/2024

### WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

Date of Government Version: 02/11/2021

### WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

### CERS: CalEPA Regulated Site Portal Data

The CalEPA Regulated Site Portal database combines data about environmentally regulated sites and facilities in California into a single database. It combines data from a variety of state and federal databases, and provides an overview of regulated activities across the spectrum of environmental programs for any given location in California. These activities include hazardous materials and waste, state and federal cleanups, impacted ground and surface waters, and toxic materials

### EDR HIGH RISK HISTORICAL RECORDS

#### ***EDR Exclusive Records***

#### **EDR MGP: EDR Proprietary Manufactured Gas Plants**

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

### EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

### EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

### OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

#### CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 02/05/2024  
Date Data Arrived at EDR: 02/06/2024  
Date Made Active in Reports: 04/25/2024  
Number of Days to Update: 79

Source: Department of Energy & Environmental Protection

**Sensitive Receptors:** There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

### AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

### Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

### Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

## **GEOCHECK® - PHYSICAL SETTING SOURCE ADDENDUM**

### **TARGET PROPERTY ADDRESS**

CHERRY CHANNEL DRAINAGE PROJECT  
NOT REPORTED  
BEAUMONT, CA 92223

### **TARGET PROPERTY COORDINATES**

Latitude (North):	33.952941 - 33° 57' 10.59"
Longitude (West):	116.964057 - 116° 57' 50.61"
Universal Transverse Mercator:	Zone 11
UTM X (Meters):	503321.2
UTM Y (Meters):	3756744.5
Elevation:	2715 ft. above sea level

### **USGS TOPOGRAPHIC MAP**

Target Property Map:	50004942 BEAUMONT, CA
Version Date:	2021

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

### TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

### TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SW

### SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

### FEMA FLOOD ZONE

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>
06065C0805G	FEMA FIRM Flood data
<u>Additional Panels in search area:</u>	<u>FEMA Source Type</u>
06065C0803G	FEMA FIRM Flood data

### NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
BEAUMONT	YES - refer to the Overview Map and Detail Map

### HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

### AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

## **GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY**

### **GROUNDWATER FLOW VELOCITY INFORMATION**

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

### **GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY**

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

#### **ROCK STRATIGRAPHIC UNIT**

Era:	Cenozoic
System:	Quaternary
Series:	Quaternary
Code:	Q (decoded above as Era, System & Series)

#### **GEOLOGIC AGE IDENTIFICATION**

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

#### Soil Map ID: 1

Soil Component Name: RAMONA

Soil Surface Texture: sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	14 inches	sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 4 Min: 1.4	Max: 8.4 Min: 6.6
2	14 inches	22 inches	fine sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 4 Min: 1.4	Max: 8.4 Min: 6.6
3	22 inches	68 inches	sandy clay loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 4 Min: 1.4	Max: 8.4 Min: 6.6

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
4	68 inches	74 inches	gravelly sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 4 Min: 1.4	Max: 8.4 Min: 6.6

### Soil Map ID: 2

Soil Component Name: GREENFIELD

Soil Surface Texture: sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	25 inches	sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 8.4 Min: 6.6

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
2	25 inches	42 inches	fine sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 8.4 Min: 6.6
3	42 inches	59 inches	loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 8.4 Min: 6.6
4	59 inches	72 inches	stratified loamy sand to sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 8.4 Min: 6.6

### Soil Map ID: 3

Soil Component Name: HANFORD

Soil Surface Texture: coarse sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	7 inches	coarse sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 7.8 Min: 5.6
2	7 inches	40 inches	fine sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 7.8 Min: 5.6
3	40 inches	59 inches	stratified loamy sand to coarse sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 7.8 Min: 5.6

### LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

# PHYSICAL SETTING SOURCE RECORDS SEARCHED

## TOPOGRAPHIC INFORMATION

### USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

### Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

## HYDROLOGIC INFORMATION

**Flood Zone Data:** This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

**NWI:** National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

### State Wetlands Data: Wetland Inventory

Source: Department of Fish and Wildlife

Telephone: 916-445-0411

## HYDROGEOLOGIC INFORMATION

### AQUIFLOW<sup>R</sup> Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

## GEOLOGIC INFORMATION

### Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

### STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

### SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

# PHYSICAL SETTING SOURCE RECORDS SEARCHED

## LOCAL / REGIONAL WATER AGENCY RECORDS

### FEDERAL WATER WELLS

#### PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

#### PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

#### USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

## OTHER STATE DATABASE INFORMATION

### Groundwater Ambient Monitoring & Assessment Program

State Water Resources Control Board

Telephone: 916-341-5577

The GAMA Program is California's comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Health Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

### Water Well Database

Source: Department of Water Resources

Telephone: 916-651-9648

### California Drinking Water Quality Database

Source: Department of Public Health

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

### Geothermal Wells Listing

Department of Conservation

Telephone: 916-445-9686

Geothermal well means a well constructed to extract or return water to the ground after it has been used for heating or cooling purposes. Geothermal wells in California (except for wells on federal leases which are administered by the Bureau of Land Management) are permitted, drilled, operated, and permanently sealed and closed (plugged and abandoned) under requirements and procedures administered by the Geothermal Section of the Department of Conservation's Geologic Energy Management Division (CalGEM, formerly DOGGR).

### California Oil and Gas Well Locations

Source: Dept of Conservation, Geologic Energy Management Division

Telephone: 916-323-1779

Oil and Gas well locations in the state.

## PHYSICAL SETTING SOURCE RECORDS SEARCHED

### California Earthquake Fault Lines

Source: California Division of Mines and Geology

The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

### RADON

#### State Database: CA Radon

Source: Department of Public Health

Telephone: 916-210-8558

Radon Database for California

#### Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

#### EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRRA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

## EXECUTIVE SUMMARY

### DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available business directory data at approximately five year intervals.

### RECORD SOURCES

The EDR City Directory Report accesses a variety of business directory sources, including Haines, InfoUSA, Polk, Cole, Bresser, and Stewart. Listings marked as EDR Digital Archive access Cole and InfoUSA records. The various directory sources enhance and complement each other to provide a more thorough and accurate report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer.

### RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. A check mark indicates where information was identified in the source and provided in this report.

Contact: Kelsey Hilton

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Ninyo & Moore were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting [www.edrnet.com/sanborn](http://www.edrnet.com/sanborn).

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

### UNMAPED PROPERTY

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

Sanborn® Library search results

Certification #: A507-49F0-B96A

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- ☒ Library of Congress
- ☒ University Publications of America
- ☒ EDR Private Collection

# APPENDIX F

## Vapor Encroachment Screening

Phase I ESA Vapor Encroachment Conditions (VEC) matrix includes a (1) Search Radius Test, (2) Chemicals of Concern Test (COC), and (3) a Critical Distance Test [1].

**(1) Search Radius Test:** Are there any known or suspect contaminated properties in the primary area of concern within the corresponding search radii (including the site)?

Yes    No    If **No**, then screening for a VEC is complete and no VEC *currently* exists, go to #4. If **Yes**, then:

**(2) Chemicals of Concern Test:** Are COC likely to be present within the area of concern for those known or suspect contaminated sites identified based on the Search Distance Test?

☐ Yes ☐ No    If **No**, then screening for a VEC is complete and no VEC *currently* exists, go to #4. If **Yes**, then:

**(3) Critical Distance Test\*:** A plume test to determine whether or not COC in the contaminated plume(s) may be within the critical distance.

☐ Yes ☐ No    (3a) Is information related to the contaminated(s) plume available (i.e. iso-concentration maps, site drawings, etc.)?

(3b) If **No**, then a VEC cannot be ruled out; check **Yes** in #4 below indicating it is likely a VEC exists. If **Yes**, then:

☐ Yes ☐ No    (3c) Is the site less than 100 feet to the nearest edge of a contaminated [non-petroleum hydrocarbon] plume(s)? If **Yes**, then check **Yes** in #4 below indicating it is likely a VEC exists.

☐ Yes ☐ No    (3d) Is the site less than 30 feet to the nearest edge of a dissolved petroleum hydrocarbon plume(s)? If **Yes**, then check **Yes** in #4 below indicating it is likely a VEC exists.

\*If the distance from the nearest edge of a contaminated plume to the nearest existing or planned structure on the site is less than 100 feet for non-petroleum hydrocarbon COC, or less than 30 feet for dissolved petroleum hydrocarbons, then it is presumed that a VEC *currently* exists beneath the site. If the distance from the nearest edge of the contaminated plume is greater than or equal to 100 feet for non-petroleum hydrocarbons, or 30 feet for dissolved petroleum hydrocarbon chemicals of concern, then it is presumed unlikely that a VEC *currently* exists beneath the site.

**(4) Is it likely that a VEC *currently* exists beneath the site?**

☐ Yes ☐ No    If **No**, then the VEC screening is complete and no further investigation is recommended at this time. If **Yes**, Ninyo & Moore recommends performing additional assessment, such as a Tier 2 VEC assessment according to ASTM E 2600-10.

[1] Based on guidance presented in the ASTM E 2600-10 Standard.

# APPENDIX G

## Qualification of the Environmental Professionals

# Benjamin White

## Project Geologist

### EDUCATION

B.S., Geology, San Jose State University,  
San Jose, 2019

### REGISTRATIONS/ CERTIFICATIONS

OSHA HAZWOPER 40-Hour Certification

OSHA Ladder Safety Training

OSHA Field Work Safety

Valley Fever Training

Driver Training

As a Project Geologist with Ninyo & Moore, Mr. White assists in the performance of Phase I and II Environmental Site Assessments, Air Quality Monitoring, Groundwater and Soil Sampling, Human Health Risk Assessments, and the production of Health & Safety Plans. Mr. White is very familiar with soil vapor and indoor air screening levels and toxicity reference values, interpreting historical aerial photography for potential environmental concerns, basic surveying and Geographic Information Systems data workflows, and serving clients in escrow so that lender requirements regarding environmental due diligence and liability are addressed satisfactorily.

### EXPERIENCE

**Active Dry-Cleaning Facility, Montebello, California:** As a Project Geologist, Mr. White provided environmental consulting services to a private client related to the assessment and recommendations concerning the potential extent and effectiveness of past soil vapor extraction remedial actions of a known PCE impact to the subsurface of the site from historical dry-cleaning operations.

**Former Chemical Manufacturing Site, Santa Fe Springs, California:** As a Project Geologist, Mr. White provided environmental services to a private client related to Operations and Maintenance of a groundwater extraction and treatment system. Mr. White completed the regular servicing of field meters, an entrainment tank, bag filter housings, carbon vessels, and the recurring sampling of influent to, and effluent from, the primary carbon vessel to ensure that groundwater treated by the system was meeting Los Angeles County Sanitation Districts (LACSD) effluent discharge requirements prior to entering the LACSD water treatment system.

**Active Dry-Cleaning and Former Grocery Store Site, Lancaster, California:** As a Staff Geologist, Mr. White provided environmental consulting services to a private client related to a Phase II Environmental Site Assessment of soil vapor and indoor conditions for private client to assess whether historical operations of a dry cleaner **that have utilized tetrachloroethene (PCE) may have impacted the site.** Mr. White's environmental consulting services included on-site oversight of the subcontractor, preparation of a report documenting field operations and analytical results, and advising the client on results and any potential environmental concerns for future use of the site.

**Former Refinery Site, Long Beach, California:** As a Staff Geologist, Mr. White provided environmental and environmental consulting services to a private client related to South Coast Air Quality Management District (SCAQMD) Rule 1166 impacted soil emission monitoring during demolition of underground oil refining and storage appurtenances and installation of new underground appurtenances, soil sampling for impacts from historical refining and storage operations, on-site supervision of the installation of underground collection piping for a large soil vapor extraction system, and a Phase I Environmental Site Assessment for the site following completion of a warehouse building.

# Jeff Aguilar, PG

## Principal Geologist

First Aid and CPR Training

### PROFESSIONAL AFFILIATIONS

South Coast Geological Society

As a Principal Geologist, Mr. Jeff Aguilar has extensive experience as an environmental geologist and project manager and is skilled in portfolio and project management, regulatory and client interactions, technical report writing and data analysis. His areas of expertise include developing investigative scopes of work, cost proposals; permitting; feasibility studies; **methane surveys**, remedial design and implementation; subcontractor management; operation of treatment systems; compliance monitoring; reporting and regulatory negotiations. He is knowledgeable in the regulatory process of federal, state, and local agencies including the United States Environmental Protection Agency (USEPA), California Regional Water Quality Control Board (RWQCB) Cal- EPA Department of Toxic Substances Control (DTSC), South Coast Air Quality Management District (SCAQMD) and Orange County Health Care Agency (OCHCA).

### RELEVANT PROJECT EXPERIENCE

**Exide Lead Smelter, Vernon, California:** Lead geologist retained to investigate and characterize contaminants associated with 100 years' worth of industrial use on a former lead smelter property. Ensured regulatory compliance during the demolition of the property and provided technical review and approval of all reports and regulatory required documents. Calculated and managed the total cleanup cost of the site which was expected to exceed 100 million. Was responsible for tracking and maintaining the budget and management of all subcontractors. Oversaw all fieldwork associated with the project and managed all subcontractor budgets and invoicing. Was involved in all regulatory and legal interactions and worked to ensure that all regulatory deadlines for state and federal agencies were met. Challenges included negotiating with multiple regulatory agencies and interactions with community activists and environmental groups.

**ExxonMobil Portfolio Management, Orange and San Diego Counties, California:** Managed a portfolio of 52 sites across Orange and San Diego County for ExxonMobil. The portfolio was budgeted at 2 million annually and consisted of sites that ranged from needing closure requests to those that needed complete characterization and remediation. Implemented multiple types of remediation at the sites to expedite case closure. Managed a team that closed half of the sites within the first two years. The rapid closure schedule was completed on budget and allowed the client to sell the properties sooner than planned and with limited liability. Challenges included limited budget, a challenging regulatory environment and expedited closure schedules.

**Department of Defense Contractor, Hawthorne, California:** Conducted an expedited due diligence environmental investigation of an oilfield located on an Aerospace company for the Department of Defense. Challenges included limited historical research documents and a limited budget. Phase I and Phase II investigations were completed on time and on budget and the abandoned oilfield wells were successfully located allowing for proposed construction work to proceed without any delay to schedule.

**Aervoe Paint, Compton, California:** As Lead Geologist, I managed the investigation and remediation of a former paint manufacturer. The investigation involved installing multiple wells into the local drinking aquifer which required specialized drilling techniques and well construction to prevent contaminant migration. A specialized

# Jeff Aguilar

## Principal Geologist

remediation system was designed and constructed to remediate the large contaminant plume which underlay several city blocks. Challenges included limited access on neighboring properties and difficult drilling conditions. The investigation was completed on time and on budget and a site-specific remediation system is currently operating.

**Ammunition and Explosives Manufacturer, Hercules, California:** Oversaw the investigation of a property with a history of ammunition and explosives manufacturing. The property was to be graded to allow construction of new homes. Expedited Phase II investigations were completed using multiple types of drilling technology and contaminant impacts were located, characterized and remediated. Challenges included multiple types of contaminants and a short timeframe for project completion. Multiple drilling companies were used simultaneously to expedite the investigation and remediation. The project was finished on time allowing the construction of homes to proceed without delay.

**Chevron Bulk Terminal Project, El Segundo, California:** As Lead Geologist on this project, I oversaw the excavation of ½ mile of pipeline located in a major thoroughfare leading to a bulk terminal in El Segundo. The pipeline was exposed and replaced in sections over a six-month period. During excavation, air monitoring was performed and soil was continually inspected for impacts. Impacted soil was characterized, delineated, excavated and segregated. The characterization and excavation of the soil had to be performed quickly so as not to delay the replacement of the pipeline and to minimize the impact on traffic in the thoroughfare. Negotiations were conducted to reuse the excavated soil at a different construction site therefore saving the client on transportation and disposal costs. Challenges included working in the public right of way and safety of personnel due to traffic and heavy machinery. The project was completed safely, on time and on budget.

**ExxonMobil Groundwater Remediation System Installation, Dana Point, California:** As Lead Geologist, I oversaw the installation of a groundwater extraction system at an operating service station impacted by a historical release. Due to the time lapse between the release and discovery dates, impacted groundwater had traveled a significant distance under nearby streets with high traffic volume. A site-specific remediation system was designed but reaching the downgradient edge of the plume with the remediation system presented a challenge. A specialized drilling subcontractor was utilized to horizontally drill beneath the streets to install remedial piping without disrupting traffic. The vacuum on the remediation system was increased to accommodate the long distances that the impacted groundwater had to be pulled. The system was installed safely and on budget and after three years of operating the system, it had cleaned the site to a level where a No Further Action letter was issued.

**Lennar Home Builders, Yorba Linda, California:** Oversaw the investigation, characterization and remediation of a 35-acre parcel that was redeveloped for single family residences. The site had multiple impacts to soil from multiple contaminants and had five oil pumping wells that required abandonment prior to site redevelopment. Challenges included multiple stakeholders, challenging terrain and a challenging regulatory environment. A comprehensive remedial action plan was created, approved and implemented. The Orange County Health Care Agency agreed that the site was remediated to their standards and construction was allowed to proceed with no delay. All work was completed safely with little to no impact to the surrounding neighborhood.
